# METADATA ON HOUSEHOLD CONSUMPTION EXPENDITURE SURVEY, 2025

## Producer

The Household Consumption Expenditure Survey (HCES) 2025 was conducted by the National Statistics Bureau (NSB) and funded by the Royal Government of Bhutan.

## Objective

The objectives of the 2025 HCES are:

1. To provide data for the compilation of national accounts, specifically for household consumption and expenditure;
2. To provide macroeconomic indicators, including the average monthly household per capita consumption expenditure and the average monthly per capita quantity of specific items consumed, among others; and
3. To provide benchmark information to upgrade weights used in the computation of Consumer Price Index (CPI).

## Methodology

The 2025 HCES questionnaire contains the following sections:

1. Household Profile
  - Household members demographics
  - Household information (housing characteristics)
2. Income
3. Food Consumption
  - Food consumption
  - Food away from home
  - Special family occasion
4. Non-food expenditure

In order to maintain comparability, the classification of items in the questionnaire is in line with the “Classification of the Individual Consumption by Purpose” (COICOP). The content of the questionnaire was in coherence with the stakeholders and the national needs. After thorough consultation with the stakeholders, a comprehensive pretest was carried out in four different regions of the country to determine average time taken, flow and relevancy of the questions and to precisely estimate the budget and man force required for the conduct of the survey.

## Reference period

The reference period of the HCES 2025 was the year 2024 (1<sup>st</sup> January – 31<sup>st</sup> December). Although the required frequency was monthly, to accurately estimate mean monthly household food consumption expenditure, questions were asked using six different reference

# METADATA ON HOUSEHOLD CONSUMPTION EXPENDITURE SURVEY, 2025

periods: at least once a week, once every two weeks, once a month, once every three months, once every six months, and once a year. This approach ensured that no expenses were overlooked. After collecting the responses, data from these varying reference periods were converted to a monthly value. For non-food items, questions were asked directly for the annual expenditure (in the reference period 2024).

## Coverage of the survey

HCES 2025 is designed to cover the entire country. The country has been divided into several Enumeration Areas (EAs) in both urban and rural areas. The urban areas were classified as defined by the Department of Human Settlement, Ministry of Infrastructure and Transport (MoIT), and as used in the 2017 Population and Housing Census of Bhutan (PHCB), while the rural areas comprised different gewogs and chiwogs from all 20 dzongkhags.

## Sampling frame

The sampling frame, derived from the 2017 PHCB, was used to select the Primary Sampling Units (PSUs). This frame excludes all households residing in Bhutanese embassies and missions abroad, and the Royal Bhutan Army (RBA). Additionally, households under Lunana Gewog in Gasa Dzongkhag were omitted from the sampling frame because of weather conditions during the survey period.

## Sample design

The sample for HCES 2025 was designed to provide estimates of consumption expenditure related indicators at the national and dzongkhag levels. A stratified two-stage sampling design was adopted. Urban and rural areas of each dzongkhag served as the first-level stratification. Within each first-level stratum, all PSU were arranged geographically. From this ordered list, the PSUs were further stratified in a way that the total number of households within each second-level stratum was approximately equal. The number of secondary-level strata per primary stratum was determined based on the allocated sample size. In each second-level stratum, two PSUs were selected using probability proportional to the number of households. In the second stage, a listing of all regular households in the selected PSUs was conducted. From this list, the required number of households in each selected PSU was chosen using the Circular Systematic Sampling (CSS) method.

# METADATA ON HOUSEHOLD CONSUMPTION EXPENDITURE SURVEY, 2025

## Sample size determination

Sample size determination in any survey involves a process based on certain assumptions and specifications. The process begins with identifying an appropriate sample size to generate reliable estimates of key consumption expenditure indicators for a given domain. In this context, reliability is defined in terms of the targeted level of precision, such as the coefficient of variations. The overall sample size was determined based on three broad indicators: mean monthly food expenditure, mean monthly non-food expenditure, and monthly combined mean food and non-food expenditure. Utilizing 2022 Bhutan Living Standard Survey data, the design characteristics for the indicators were computed.

In order to estimate the required sample size, the following formula was used:

$$n = \left[ \frac{C_x}{CV(\bar{x})} \right]^2 * \frac{deff}{R}$$

where:

$n$  is the expected number of households

$C_x$  is the population coefficient of variation of the variable of interest

$CV\bar{x}$  is the desired level of precision

$deff$  is the estimate of design effect, representing the impact of the survey design on the variance of the estimates

$R$  is the adjustment factor for an anticipated response

Based on the formula, around 6,200 households were selected as an annual sample for this survey.

# METADATA ON HOUSEHOLD CONSUMPTION EXPENDITURE SURVEY, 2025

## Sample allocation

The allocated sample size for each domain was further distributed proportionately between urban and rural strata, except in the four thromdes. The table below shows the allocated sample size by domain and urban-rural strata, based on a total sample size of approximately 6,200 households.

Domain	Allocated Sample Size		
	Rural	Urban	Overall
Bumthang	128	72	200
Chhukha*	224	288	512
Dagana	192	48	240
Gasa	119	57	176
Haa	128	48	176
Lhuentse	160	24	184
Monggar	192	72	264

<b>Overall</b>	<b>3,767</b>	<b>2,433</b>	<b>6,200</b>

# METADATA ON HOUSEHOLD CONSUMPTION EXPENDITURE SURVEY, 2025

## Response rate

Out of the 6,200 sampled households, 5,883 households successfully responded to the survey questionnaire, yielding a 94.9% response rate. However, 4.9% did not participate, as household members remained unreachable despite multiple visits. The non-response may be partly influenced by cultural and religious events, such as Tshechu festivals and other religious gatherings, which led to challenges in contacting participants. Additionally, the enumeration area in Pasakha, Phuentsholing Dungkhang, was found to have no regular households, as the zone had been transformed into an industrial area, accounting for 0.2% of the surveyed population.

## Questionnaire

Refer annexure 1 for the questionnaire.

## Data Collection

The field data collection was conducted for the duration of one month supervised by the Dzongkhag Statistical Officers in the respective dzongkhags assisted by some of the staffs from the headquarter. The data consistency checks and revalidations were done by the respective supervisors during the field enumeration. Data was captured during a single visit to the household. In case where a head of household or competent member of households could not be contacted during the first visit, a minimum of three revisits were made. In some cases, the respondents were contacted through the telephone. The data collection was conducted using Computer Assisted Personal Interviewing (CAPI) method on the survey solution systems.

## Data processing

The field data was collected using CAPI. The soft copy of the questionnaire was designed in the survey solutions system. Data consistency checks were done by the respective supervisors during field enumeration and verified by the CAPI Focal with support from the NSB Headquarter. The data validation, cleaning, tabulations and report writing were undertaken for one and half months (45 days) using statistical software STATA Ver.17. The sampling weights were developed and assigned to individual households to obtain the estimates for target population. The analysis was based on 5,883 households. Descriptive statistics were provided through the use of graphs and tables wherever necessary.

# METADATA ON HOUSEHOLD CONSUMPTION EXPENDITURE SURVEY, 2025

## Survey key findings

### Population and Household Composition

Based on the survey design, the total number of households represented in this survey is 159,808 nationwide. Out of these, 37.7% reside in urban areas and 66.3% in rural areas. Likewise, this survey represents about 592,598 population of which 36.6% resides in urban areas and 63.4% in rural areas. The mean household size is 3.7 persons, with a slight variation between rural (3.8) and urban (3.6) settings. Across dzongkhags, household sizes range from 3.4 in Gasa and Pema Gatshel to 4.5 in Trongsa. Among the Thromdes, Thimphu Thromde has the largest mean household size (3.6), while Samdrup Jongkhar Thromde has the smallest (3.4).

Approximately 62.3% of Bhutanese households are headed by men, a pattern consistent across both urban and rural areas. However, seven dzongkhags including Gasa, Trashi Yangtse, Punakha, Paro, Wangdue Phodrang, Lhuentse, and Bumthang demonstrate a majority of female-headed household, with Bumthang reporting the highest proportion at 72%. Female household heads make up 37.7% of the households in the country with 23.7% in rural areas and 14% in urban households.

Age distribution indicates urban household heads tend to be younger (median age 39) compared to their rural counterparts (median age 49). The mean age of household heads reaches 50 in rural areas and 41 in urban areas, with male heads generally older than female heads across both areas.

The median age of the surveyed population is 32 years with 23.9% of the population being below 15 years and 9.2% being above 65 years. The population structure shows concentration in younger cohorts, particularly in the 10-14 and 15-19 age brackets, followed by those aged 30-34. A notable population decline begins from the 40-44 age group onward. Gender distribution includes 292,227 males and 300,371 females, with approximately 37% residing in urban areas and 63% in rural regions.

Working-age individuals (15-64 years) constitute 66.8% of the population, children (0-14 years) represent 23.9%, and elderly citizens (65+ years) account for 9.2%. The working-age proportion shows a slight urban advantage (68.3%) over rural areas (66%). The dependency ratio stands at 49 dependents per 100 working-age individuals nationwide, with rural areas facing a higher burden (51.5%) than urban areas (46.5%). The national median age is 32 years, with urban populations (28 years) notably younger than rural communities (34 years).

A notable finding of the survey is the male to female sex ration. The sex ration indicates a female majority nationwide with a sex ratio of 97 males per 100 females. This ratio fluctuates across age groups: 106 in children (0-14), 93 in working-age adults (15-64), and 106 among seniors (65+).

# METADATA ON HOUSEHOLD CONSUMPTION EXPENDITURE SURVEY, 2025

Among adults (15+ years), 66.5% are currently married, 4% are divorced, 5.8% are widowed, and nearly 1% are separated. Approximately 22% have never married, while less than 1% cohabit without marriage. The mean age of married individuals is 45 years, with married men (47 years) slightly older than married women (44 years).

## Housing Characteristics

Housing patterns reveal that around 60% of Bhutanese reside in standalone houses, 34% in separate apartments, 5% in shared accommodations, and just over 1.0% in alternative dwelling types. Rural-urban differences are pronounced, with 82.2% of rural households occupying houses compared to just 23.2% of urban households, where apartments predominate (66.9%) as the preferred housing.

Home ownership stands at 53.2% nationwide, with significant variation among dzongkhags. Lhuentse (84.3%), Dagana (84.1%), and Samdrup Jongkhar (82%) show the highest ownership rates, while Thimphu (36.1%) and Paro (38.4%) demonstrate the lowest. Among thromdes, Phuentsholing Thromde has the lowest ownership rate (8.7%), contrasting with Gelephu Thromde's relatively higher rate (25.4%). The rural-urban home ownership gap is substantial with 75.8% in rural areas owning homes compared with 16% in urban areas.

The use of construction materials for housing varies significantly across dzongkhags. Approximately 48.5% of dwellings feature brick/cement block/autoclaved aerated concrete exterior walls, followed by stone with mud (20.1%) and stone with cement (9.3%). Urban dwellings predominantly use brick/cement construction (73.1%). Rural homes show greater material use diversity with brick/cement (33.5%) and stone with mud (31.1%) being the most common.

About 97% of households use metal sheets for roofing across both urban and rural settings. Flooring materials typically include cement/concrete (44.8%) and timber planks (30.7%), with urban areas favoring cement/concrete (49.5%) and tiles (16%), while rural dwellings more frequently use timber planks (40.3%).

Electricity coverage in Bhutanese homes is 99.6%, and serves as the primary cooking energy source for both rural (96.1%) and urban (96.7%) households. 90.3% of urban households and 80.8% of rural households also use LPG for cooking. While the use of electricity and LPG is the predominant source of energy for cooking, about 12.0% of households still rely on fuelwood for cooking.

## Household Consumption Expenditure

The nationwide mean monthly household consumption expenditure was Nu 54,387, with urban households (Nu 67,616) significantly outspending rural households (Nu 46,331). On a per capita basis, the national consumption expenditure average stood at Nu 17,434, with urban residents (Nu 22,168) spending more than rural residents (Nu 14,550).

# METADATA ON HOUSEHOLD CONSUMPTION EXPENDITURE SURVEY, 2025

The highest quintile's mean monthly household expenditure (Nu 96,998) almost quadrupled the lowest quintile's spending (Nu 25,862). This disparity is even more pronounced in per capita terms, with the fifth quintile (Nu 40,626) outspending the first (Nu 5,545) by more than sevenfold. Notably, household size decreases as economic status improves, from 4.8 persons in the lowest quintile to 2.6 in the highest.

Food consumption accounts for 40.5% of total household expenditure (Nu 7,069 per capita), while non-food items comprise 59.5% (Nu 10,365 per capita). As economic status improves, food's proportion to total expenditure declines from 49.1% in the lowest quintile to 34.9% in the highest quintile.

Thimphu leads in household expenditure (Nu 73,632), while Trashigang records the lowest (Nu 26,934). Per capita expenditure peaks in Paro (Nu 24,403) and Thimphu (Nu 24,228), in huge contrast with Trashigang (Nu 9,025). Among thromdes, Thimphu Thromde shows the highest mean monthly household expenditure (Nu 79,124) with a per capita expenditure of Nu 25,958, while Phuentsholing Thromde records the lowest in both categories (Nu 53,175 and Nu 17,264).

## Food Consumption Expenditure

The nationwide mean monthly household food consumption expenditure stands at Nu 21,991 with a per capita expenditure of Nu 7,069. Urban food expenditure (Nu 23,728 per household; Nu 9,126 per capita) substantially exceeds rural expenditure (Nu 17,194 per household; Nu 5,816 per capita).

The food consumption expenditure is primarily spent on cereals and cereal products (21.4%), followed by dairy products, edible oil (19.5%), vegetables (15.49%), and meat and fish (12.92%). Rural households allocate proportionally more to staple foods, while urban dwellers spend relatively more on meat and fish products.

Rural households' expenditure on cereals contribute 55.6% of total cereal expenditure (Nu 5,524) compared with lower mean spending of Nu 4,212 in urban areas. Meanwhile, reflecting regional dietary preferences and economic conditions, cereal expenditure varies dramatically by dzongkhags, from Nu 10,371 in Trongsa to Nu 2,811 in Samdrup Jongkhar.

## Non-Food Consumption Expenditure

Non-food expenditure priorities shift with consumption quintiles. For most households (first through fourth quintiles), housing, utilities, and fuel dominate non-food expenditure.

# METADATA ON HOUSEHOLD CONSUMPTION EXPENDITURE SURVEY, 2025

However, in the wealthiest quintile, transportation becomes the leading expense, followed by housing-related costs.

Expenditures on insurance and financial services; information and communication; clothing, and footwear increase steadily with household wealth. Health-related expenditure remains consistently low among non-food expenditure categories across all consumption quintiles.

Between urban and rural households, urban non-food expenditure (Nu 13,042) exceeds rural spending (Nu 8,735), which may reflect differences in lifestyle patterns, access to services, and consumption priorities between urban and rural populations.

## Variable name, label and description

This section gives detail description of all the variables given in the dataset. Refer to the COICOP 2018 for more details on divisions and subclasses of the items at [https://unstats.un.org/unsd/classifications/Econ/Download/COICOP\\_2018\\_draft\\_publication.pdf](https://unstats.un.org/unsd/classifications/Econ/Download/COICOP_2018_draft_publication.pdf)

Variable Name	Variable Label	Description
<b>interview__key</b>	Interview key (identifier in XX-XX-XX-XX format)	Unique identifier for the interview in a specific format (e.g., 12-34-56-78).
<b>interview__id</b>	Unique 32-character long identifier of the interview	A 32-character unique ID for each interview.
<b>Dzongkhag</b>	Dzongkhag	20 Dzongkhags
<b>dcode</b>	Dzongkhag code	Code representing the Dzongkhag (district).
<b>gtname</b>	Gewog or Town name	Name of the Gewog or town.
<b>gtcode</b>	Gewog or Town code	Code for the Gewog or town.
<b>domain</b>	24 domains	Represents 24 distinct survey domains (i.e., 20 dzongkhags and 4 thromdes).

# METADATA ON HOUSEHOLD CONSUMPTION EXPENDITURE SURVEY, 2025

<b>area</b>	Area of Rural Urban and Thromde	Classification of area as rural, urban, or Thromde (municipal area).
<b>area2</b>	Area of Rural and Urban (Urban contains Thromde as well)	Simplified area classification: rural or urban (urban areas includes Thromde).
<b>hh_serialno</b>	Household Serial Number	Unique serial number assigned to each household.
<b>hhsz</b>	hhsz	Number of individuals in the household.
<b>uni_ea</b>	unique_ea	Unique enumeration area identifier for survey sampling.
<b>weight_final</b>	weight_final	Final survey weight for data analysis.
<b>str_code</b>	Stratum code	Code for the survey stratum (grouping for sampling purposes).
<b>hp13</b>	Type of dwelling	The category of housing structure the household resides in.
<b>hp13_others</b>	Other types of dwelling	Dwelling types not listed in predefined categories for hp13.
<b>hp14</b>	Does the household own this dwelling	Whether the household owns, rents, or has another arrangement for their dwelling.
<b>hp15</b>	Main construction material of the external walls	The primary material used for the dwelling's external walls.
<b>hp15_others</b>	Other construction materials of the external wall	Non-standard materials used for external walls not covered in hp15.
<b>hp16</b>	Main construction material of the roof	The primary material of the dwelling's roof.
<b>hp16_others</b>	Other construction materials of the roof	Roof materials not included in predefined options for hp16.

# METADATA ON HOUSEHOLD CONSUMPTION EXPENDITURE SURVEY, 2025

hp17	Main material of the floor	The primary flooring material.
hp17_others	Other material of the floor	Flooring materials not listed in hp17.
hp18	Main source of lighting	The primary lighting source.
hp18_others	Other source of lighting	Lighting sources not covered in hp18.
hp19__1	What fuel does your household use most often for cooking: Gas (LPG)	Whether LPG is the primary cooking fuel (yes/no).
hp19__2	What fuel does your household use most often for cooking: Electricity	Whether electricity is the primary cooking fuel (yes/no).
hp19__3	What fuel does your household use most often for cooking: Wood	Whether wood is the primary cooking fuel (yes/no).
hp19__4	What fuel does your household use most often for cooking: Coal	Whether coal is the primary cooking fuel (yes/no).
hp19__5	What fuel does your household use most often for cooking: Kerosene	Whether kerosene is the primary cooking fuel (yes/no).
hp19__6	What fuel does your household use most often for cooking: Dung Cake	Whether dung cake is the primary cooking fuel (yes/no).
hp19__7	What fuel does your household use most often for cooking: Bio-Gas	Whether biogas is the primary cooking fuel (yes/no).
hp19__8	What fuel does your household use most often for cooking: Solar	Whether solar is the primary cooking fuel (yes/no).
hp19__96	What fuel does your household use most	Whether other unspecified cooking fuels are used (yes/no).

# METADATA ON HOUSEHOLD CONSUMPTION EXPENDITURE SURVEY, 2025

	often for cooking: Other	
<b>hp19_others</b>	Other fuels for cooking	Details of other cooking fuels recorded in hp19__96.
<b>hp20__1</b>	Firewood: Yes, Backloads of firewood	Whether the household uses backloads to transport firewood (yes/no).
<b>hp20__2</b>	Firewood: Yes, Truckloads of firewood	Whether the household uses truckloads to transport firewood (yes/no).
<b>hp20__3</b>	Firewood: Yes, loads of other vehicles	Whether the household uses other vehicles for firewood transport (yes/no).
<b>hp20__4</b>	Firewood: No	Whether the household does not use firewood (yes/no).
<b>hp20_others</b>	Other vehicles	Details of other vehicles used for firewood transport in hp20__3.
<b>hp20_other_vehicles</b>	Other vehicles	Details of other vehicles used for firewood transport, same as hp20_others.
<b>hp20a</b>	Firewood-backloads	The number of backloads of firewood used by the household.
<b>hp20b</b>	Backload-average pay	The average cost per backload of firewood.
<b>hp20c</b>	Firewood-truckload	The number of truckloads of firewood used by the household.
<b>hp20d</b>	Truckload-average pay	The average cost per truckload of firewood.
<b>hp20e</b>	Firewood-vehicleload	The number of loads from other vehicles used for firewood.
<b>hp20f</b>	Vehicleload-average pay	The average cost per load of firewood from other vehicles.

# METADATA ON HOUSEHOLD CONSUMPTION EXPENDITURE SURVEY, 2025

<b>hp21</b>	Sickness or injury	Whether any household member experienced sickness or injury.
<b>hp22__1</b>	Type of health facilities visited: Yes, Government Health facilities - In country	Whether in-country government health facilities were visited (yes/no).
<b>hp22__2</b>	Type of health facilities visited: Yes, Government Ex-country - referral	Whether government health facilities abroad were visited via referral (yes/no).
<b>hp22__3</b>	Type of health facilities visited: Yes, Private Diagnostic Center - in country	Whether in-country private diagnostic centers were visited (yes/no).
<b>hp22__4</b>	Type of health facilities visited: Yes, Private ex-country treatment	Whether private healthcare abroad was accessed (yes/no).
<b>hp22__5</b>	Type of health facilities visited: No	Whether no health facilities were visited (yes/no).
<b>hp23__1</b>	Reasons for not visiting: No need	Whether health facilities were not visited because there was no need (yes/no).
<b>hp23__2</b>	Reasons for not visiting: No time	Whether health facilities were not visited due to lack of time (yes/no).
<b>hp23__3</b>	Reasons for not visiting: No money	Whether health facilities were not visited due to financial constraints (yes/no).
<b>hp23__4</b>	Reasons for not visiting: No Transportation	Whether health facilities were not visited due to lack of transportation (yes/no).
<b>hp23__5</b>	Reasons for not visiting: Too Far	Whether health facilities were not visited because they are too far (yes/no).
<b>hp23__6</b>	Reasons for not visiting: Doesn't trust	Whether health facilities were not visited due to lack of trust (yes/no).
<b>hp23__96</b>	Reasons for not visiting: Other (specify)	Whether health facilities were not visited for

# METADATA ON HOUSEHOLD CONSUMPTION EXPENDITURE SURVEY, 2025

		other unspecified reasons (yes/no).
<b>hp23_others</b>	Other reasons for not visiting	Details of other reasons recorded in hp23__96.
<b>back_load</b>	Monthly backload value	The total monetary value of backloads of firewood used monthly.
<b>truck_load</b>	Annual truck load value	The total monetary value of truckloads of firewood used annually.
<b>oth_veh_load</b>	Annual Other vehicle value	The total monetary value of firewood transported by other vehicles annually.
<b>truck_load_mon</b>	Monthly truckload value	The total monetary value of truckloads of firewood used monthly.
<b>oth_veh_load_mon</b>	Monthly other vehicle value	The total monetary value of firewood transported by other vehicles monthly.
<b>month_fuelwood_value</b>	Total month fuelwood value	The total monetary value of all firewood used monthly.
<b>ttot_m_value_rice</b>	Total monthly value of rice in ngultrums	Total Monthly expenditure on rice in Bhutanese Ngultrums (NU).
<b>ttot_m_value_zaw</b>	Total monthly value of zaw in ngultrums	Total Monthly expenditure on zaw (processed rice) in NU.
<b>ttot_m_value_maize</b>	Total monthly value of maize in ngultrums	Total Monthly expenditure on maize in NU.
<b>ttot_m_value_kharang</b>	Total monthly value of kharang in ngultrums	Total Monthly expenditure on kharang (coarse maize flour) in NU.
<b>ttot_m_value_tengma</b>	Total monthly value of tengma in ngultrums	Total Monthly expenditure on tengma (flattened maize) in NU.

### HOUSEHOLD CONSUMPTION AND EXPENDITURE SURVEY 2025

ཁྱིམ་གྲང་པའི་ཉེར་རྒྱུན་དང་ཟང་འགོ་བརྟུན་ཞིབ ༢༠༢༥།

**All information collected in this questionnaire will be confidential**

HOUSEHOLD IDENTIFICATION		
HH1. Dzongkhag:	<input type="text" value="prefill"/>	<input type="checkbox"/>
HH2. Town/Gewog:	<input type="text" value="prefill"/>	<input type="checkbox"/>
HH3. Chiwog/lap:	<input type="text" value="prefill"/>	<input type="checkbox"/>
HH4. EA number:		<input type="checkbox"/>
HH5. Household Serial Number:	<input type="text"/>	
HH6. Name of the Respondent:	<input type="text"/>	
HH7. Respondent's Phone/Mobile Number:	<input type="text"/>	
HH8. GPS Recording:	<input type="text"/>	
HH9. Start Time (Date and Time):	<input type="text"/>	

# METADATA ON HOUSEHOLD CONSUMPTION EXPENDITURE SURVEY, 2025

**BLOCK 1: HOUSEHOLD PROFILE**

**BLOCK 1.1: HOUSEHOLD MEMBERS' DEMOGRAPHICS**

HP1. [NAME] of the household members (begin with the household head)

1
2
...

HP2. What is the sex of [NAME]?  
[1] MALE   
[2] FEMALE

HP3. What is the relationship of [NAME] to the head of household?

[1] HEAD	[18] DAUGHTER-IN-LAW
[2] SPOUSE	[19] UNCLE
[3] SON	[20] AUNT
[4] DAUGHTER	[21] NIECE
[5] FATHER	[22] ADOPTED SON
[6] MOTHER	[23] ADOPTED DAUGHTER
[7] BROTHER	[24] FOSTER SON
[8] SISTER	[25] FOSTER DAUGHTER
[9] GRAND-FATHER	[26] STEP SON
[10] GRAND-MOTHER	[27] STEP DAUGHTER
[11] GRAND-SON	[28] STEP FATHER
[12] GRAND-DAUGHTER	[29] STEP MOTHER
[13] FATHER-IN-LAW	[30] OTHER FAMILY RELATIVES
[14] MOTHER-IN-LAW	[31] LIVE IN SERVANT
[15] BROTHER-IN-LAW	[32] OTHER NON- RELATIVES
[16] SISTER-IN-LAW	[96] OTHER (SPECIFY)
[17] SON-IN-LAW	

HP4. How old is [NAME]? (Write in completed years)

HP5. What is the present marital status of [NAME]?  
[1] NEVER MARRIED  
[2] LIVING TOGETHER  
[3] MARRIED   
[4] DIVORCED  
[5] SEPARATED  
[6] WIDOW/WIDOWER

HP6. What is Nationality of [NAME]?  
[1] BHUTANESE   
[2] NON-BHUTANESE

*(for members 2 years and above)*

HP7. Has [NAME] attended or is attending ECCD/School/College/Institute?  
[1] CURRENTLY ATTENDING/ATTENDED   
[2] NEVER ATTENDED (-> HP9)

HP8. What is the highest education grade completed of [NAME] ?

[0] PRE PRIMARY (PP)	[12] GRADE 12
[1] GRADE 1	[13] CERTIFICATE
[2] GRADE 2	[14] DIPLOMA
[3] GRADE 3	[15] BACHELOR'S DEGREE - FIRST YEAR
[4] GRADE 4	[16] BACHELOR'S DEGREE- SECOND YEAR
[5] GRADE 5	[17] BACHELOR'S DEGREE - THIRD YEAR
[6] GRADE 6	[18] BACHELOR'S DEGREE - FOURTH YEAR
[7] GRADE 7	[19] POST GRADUATE DIPLOMA
[8] GRADE 8	[20] MASTER'S DEGREE/MPHIL
[9] GRADE 9	[21] PhD
[10] GRADE 10	[22] ECCD
[11] GRADE 11	

# METADATA ON HOUSEHOLD CONSUMPTION EXPENDITURE SURVEY, 2025

**HP9.** Did [NAME] ever receive other type of learning (monastic, non-formal, other)?  
[1] YES   
[2] NO (>> HP12)

**HP10.** What other type of learning has [NAME] attended or is attending?  
[1] MONASTIC EDUCATION   
[2] NON-FORMAL EDUCATION   
[96] OTHER (SPECIFY)

**HP11.** Can [NAME] read and write short text in:

	YES	NO
[A] DZONGKHA	<input type="checkbox"/>	<input type="checkbox"/>
[B] ENGLISH	<input type="checkbox"/>	<input type="checkbox"/>
[B] LHOTSHAM	<input type="checkbox"/>	<input type="checkbox"/>
[C] OTHER LANGUAGE	<input type="checkbox"/>	<input type="checkbox"/>

**HP12.** Was [NAME] engaged in any form of economic activity in 2024?  
[1] YES   
[2] NO

**BLOCK 1.2: HOUSEHOLD INFORMATION**

**HP13.** Type of dwelling  
[1] HOUSE  
[2] APARTMENT  
[3] PART OF HOUSE/SHARED APARTMENT   
[96] OTHER (SPECIFY)

**HP14.** Does the household own this dwelling?  
[1] YES   
[2] NO

**HP15.** What is the main construction material of the external walls?  
[1] BRICKS/CEMENT BLOCKS/AUTOCLAVED AERATED CONCRETE (AAC)  
[2] STONE WITH MUD  
[3] WOOD PLANKS  
[4] BAMBOO WITH MUD  
[5] STONE WITH CEMENT  
[6] RAMMED EARTH   
[7] CANE/BAMBOO  
[8] TRUNKS/BANANA LEAVES  
[9] PLYWOOD  
[10] MUD BLOCKS  
[96] OTHER (SPECIFY)

**HP16.** What is the main construction material of the roof?  
[1] METAL SHEETS (CGI)  
[2] THATCH/BANANA LEAF  
[3] BAMBOO  
[4] PLANKS/SHINGLES  
[5] TARPAULIN   
[6] TILES  
[7] SLATES  
[8] CONCRETE/CEMENT  
[9] TIN SHEETS  
[96] OTHER (SPECIFY)

**HP17.** What is the main material of the floor?  
[1] PLANKS ON TIMBER  
[2] PLANKS ON CONCRETE  
[3] CEMENT/CONCRETE  
[4] TERRAZO  
[5] EARTHEN/CLAY FLOOR   
[6] WOOD BLOCK ON CONCRETE

# METADATA ON HOUSEHOLD CONSUMPTION EXPENDITURE SURVEY, 2025

[7] TILES ON CONCRETE  
[8] MARBLES ON CONCRETE  
[9] BAMBOO  
[10] WOOD LOGS  
[96] OTHER (SPECIFY)

**HP18. What is the main source of lighting in your dwelling?**  
[1] ELECTRICITY  
[2] KEROSENE  
[3] FIREWOOD (mebchi)   
[4] SOLAR  
[5] GENERATOR (FUEL)  
[6] CANDLE  
[96] OTHER (SPECIFY)

**HP19. What fuel does your household use most often for cooking? (Choose up to two options)**  
[A] GAS (LPG)  
[B] ELECTRICITY  
[C] WOOD   
[D] COAL  
[E] KEROSENE  
[F] DUNG CAKE  
[G] BIO-GAS  
[H] SOLAR  
[X] OTHER

**HP20. Does your household use firewood?**  
[A] YES, BACKLOADS OF FIREWOOD  
[B] YES, TRUCKLOADS OF FIREWOOD (>> HP20c)  
[C] YES, LOADS OF OTHER VEHICLES (SPECIFY) (>> HP20e)  
[D] NO (>> HP21)

**HP20a. How many backloads of firewood does your household usually use per month?**

**HP20b. How much does your household pay on average for one backload (Nu.)?**

**HP20c. How many truckloads of firewood does your household usually use per year?**

**HP20d. How much does your household pay on average for one truckload (Nu.)?**

**HP20e. How many loads of firewood does your household usually use per year using [other vehicle]?**

**HP20f. How much does your household pay on average for one load of firewood using [other vehicle]?**

**HP21. Did any of the household member suffer from any sickness or injury in 2024?**  
[1] YES  
[2] NO (>> NEXT BLOCK)

**HP22. Did they visit the health facility? (Multi-select)**  
[A] YES, GOVERNMENT HEALTH FACILITY - INCOUNTRY   
[B] YES, GOVERNMENT EX-COUNTRY - REFERRAL   
[C] YES, PRIVATE DIAGNOSTIC CENTRE - IN COUNTRY   
[D] YES, PRIVATE EX-COUNTRY TREATMENT   
[E] NO (>> HP23)

**HP23. Why didn't they visit the health facility? (Multi-select)**  
[A] NO NEED   
[B] NO TIME   
[C] NO MONEY   
[D] NO TRANSPORTATION   
[E] TOO FAR   
[F] DOESN'T TRUST   
[G] OTHER (SPECIFY)

## BLOCK 2: INCOME

**SI.1. What are your household's sources of income in 2024? (Mark all that apply)**

- [A] WAGES/SALARIES (INCLUDING RELIGIOUS FEES, TA/DA)   
[B] AGRICULTURE/HORTICULTURE   
[C] BUSINESS   
[D] PROPERTY INCOME   
[E] REMITTANCE   
[F] NON WOOD FOREST PRODUCT   
[X] OTHER (SPECIFY)

**SI. 1a. How many member(s) have an income based on the specified source?**

**SI.2. What is the total household income in 2024?**

- [1] <= 100,000  
[2] 100,001 - 200,000  
[3] 200,001 - 250,000  
[4] 250,001 - 500,000   
[5] 500,001 - 1,000,000  
[6] > 1,000,000
