Livestock Statistics 2013

Table of Contents

Foreword by Director	I
Objectives and Methods	II
Summary of Livestock Population 2013	III
Summary of Livestock production 2013	IV
Livestock animals in the Central farms 2013	V

Section I (Dzongkhag wise livestock population and production)

• Improved Cattle Breeds	1-4
• Local Cattle Breeds (including Yak and Zo/Zom)	5-14
• Equines (Horse, Mule and Donkey)	15
• Pig and Poultry	16
• Sheep and Goat	17
• Cat and Dog (only utility dogs)	18
• Dairy product produced and sold	19-20
• Meat product produced and sold	21-22
• Egg and Wool product produced and sold	23

Section II (Geog wise livestock population and production)

• Cattle population including (Yak and Buffalo)	24-112
• Equine (horse, mule and donkey)	113-121
• Pig population	122-130
• Poultry population	131-138
• Sheep and goat population	139-147
• Cat and dog (utility/pet)population	148-156
• Dairy product produced and sold	157-174
• Meat product produced and sold	175-191
• Egg, wool and honey product produced and sold	192-200

Foreword

The Livestock Statistics 2013 is the 8th series of statistics publication by the Department of Livestock (DoL) in its comprehensive effort to record information on livestock and production in the Kingdom of Bhutan.

The Publication is presented in two section:

1. Section I contains livestock population and production data at Dzongkhag level. The data for the central farms are included under respective Dzongkhags.
2. Section II contains livestock population and production data at Geog level. The data for the central farms are included under their respective Geogs.

We hope that the data will be useful, not only for the planners and researchers but also for the policy makers, who are involved in the development of the RNR sector.

I would like to extend my heartiest appreciation to all my colleagues in the Department and the Dzongkhag livestock sector, and in particular to the Information Management Section (IMS) of the Department for their invaluable efforts in bringing out this useful and informative publication.

(Dr. Tashi Samdup)
DIRECTOR

Objectives

- To establish reliable information on livestock population and production for planning and monitoring of livestock development programmes.
- To provide data for preparation of plans and programs and to understand trends in livestock population and production.

Data collection, validation

The data collecting format is designed by the IMS of the department and distributed to all the Dzongkhags. Data was collected from 205 geogs of the country at house hold level by the livestock extension personnel and also from the central farms of the department. The data validation and compilation is first done at the Geog level by the extension staff who collects the data then at dzongkhag level by the Dzongkhag Livestock Officer and forwarded to IMS of the department for further validation, compilation and publication..

Limitation on the data collected.

- As our respondents are farmers with different social and educational background, the response errors are likely to be high although various techniques are used to get correct information.
- The farmers can not keep records of production figures due to low literacy level among the general population.
- Under reporting of population and production due to taxation is another source of error.
- Incompetent source of data can be another source of error.

Livestock population Summary (2013)

HOW TO AVOID DOG BITES

Just like people, dogs perceive a new person as a stranger, and a threat! In order to **avoid dog bites**, it is important to follow these simple rules:

Q&A What should I do if a dog is aggressive and I am in danger of being bitten?

- **Do not run**, stay perfectly still
- **Back up** slowly and walk backwards until you are out of danger
- **Be Quiet.** If you yell the dog may be threatened more and they will become more aggressive
- **Avoid eye contact.** If you stare at a dog, they are further threatened
- **Put something** between you and the dog, such as a bag or anything around you.

If you are being attacked

- Drop to the ground
- Curl-up in a ball
- Cover your face using your arms

Your District Veterinary Hospital is dedicated to help you and your pets by offering:

- Registration • Sterilization • Vaccination
- De-worming • Flea and Tick Treatment

Contact your local DVH for more information

Call 124 (National Centre for Animal Health)
for suspected rabies cases in your locality

Please Remember

Never approach a dog that is sleeping or eating

Never approach a sick dog

Mother dogs are often very protective of their puppies. Never go near them, as they might bite.
